# Texas Education Agency
## Texas Public School Membership by Ethnic Group
## Campus Report - Count & Percent - 1989-90 Fall Survey

This information was compiled from the *Fall Survey of Pupils in Membership*, a one day membership count taken October 2, 1989. Districts report students by campus, grade, sex and ethnicity on the *Fall Survey*. This listing shows counts of students by ethnicity for each campus. District and county totals are provided. State totals are shown at the conclusion of the report. Campuses are sorted by campus number within each district. Districts are in county-district number sequence within counties.

Columns on the attached printout are defined as follows:

COUNTY: The county to which the district is assigned for administrative purposes.

DISTRICT/CAMPUS ID: The unique six digit district number identifying the district, with the three digit campus number shown underneath. In the past, campus numbers of 001 through 040 generally indicated a high school, 041 through 099 indicated a junior high or middle school, and 100 through 699 indicated elementary schools. Beginning in 1987-88, however, this convention was abandoned and any new campuses created since have been assigned numbers at random. The word "Special" in parentheses indicates that the district is one of six special statutory districts which are not governed by an elected school board and which do not have taxing authority.

NAME: The name of the district or campus. "HS" indicates high school, "EL" indicates elementary, "PRI" indicates primary, and "JH" indicates junior high.

TOTAL COUNT: The total membership of the campus for all grades, including counts for pre-kindergarten and early education. All counts shown are the sum of special education and regular membership.

WHITE COUNT AND PERCENT: The total membership count of students reported as white, and the percent that count is of the total membership in the campus.

HISPANIC COUNT AND PERCENT: The total membership count of students reported as Hispanic, and the percent that count is of the total membership in the campus.

BLACK COUNT AND PERCENT: The total membership count of students reported as black, and the percent that count is of the total membership in the campus.

ASIAN COUNT AND PERCENT: The total membership count of students reported as Asian, and the percent that count is of the total membership in the campus.

AMERICAN INDIAN COUNT AND PERCENT: The total membership count of students reported as American Indian or Eskimo, and the percent that count is of the total membership in the campus.

# TEXAS EDUCATION AGENCY
# 1988-89 ANALYZE DESCRIPTIONS

## AVERAGE DAILY ATTENDANCE

Districts are grouped into nine size categories according to their refined average daily attendance (ADA) for the year. Refined ADA is collected for four weeks each semester on the *Superintendent's Report of Pupil Attendance and Contact Hours, Table I.* Refined ADA is calculated by totalling attendance for the best, or highest, four weeks and dividing by four.

## DISTRICT TYPE

District are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to urban areas are used to determine the appropriate group. The groups are:

> *Major Urban.* The eight largest school districts in the state which serve the metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.
>
> *Major Suburban.* Other school districts in other large Texas cities.
>
> *Other Central City.* The major school districts in other large Texas cities.
>
> *Other Central City Suburban.* Other school districts in and around the other large, but not major, Texas cities.
>
> *Independent Town.* The largest school districts in counties with populations of 25,000 to 100,000.
>
> *Non-Metro: Fast Growing.* The school districts that fail to be in any of the above categories and that exhibit a five year growth rate of at least 20 percent. These districts must have a student population of at least 300 ADA.
>
> *Non-Metro: Stable.* The school districts that fail to be in any of the above categories and that exhibit a five year growth rate of at least 20 percent. These districts must have a student population of at least 300 ADA.
>
> *Rural.* The school districts that fail all of the above tests for placement into a category. These districts either have an ADA between 300 and the state median and a growth rate less than 20 percent, or they have an ADA less than 300.

This category was revised beginning with the 1986-87 school year. Since 1986-87, districts have been re-evaluated each year regarding their district type classification.

## PROPERTY WEALTH

Wealth is defined as total taxable property value per refined ADA and is used as an indicator of a district's ability to raise local funds. The property value used is 1988 taxable value as determined by the

State Property Tax Board (SPTB). The first wealth grouping classifies districts into ten categories with approximately equal numbers of districts in each, called deciles. The second grouping simply shows districts above and below state average wealth. The six special statutory districts form a separate group because they have no taxable property wealth.

## MAINTENANCE AND OPERATIONS EFFECTIVE TAX RATES

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. The category shows the maintenance and operation (M&O) effective tax rate, which is determined by dividing the 1988 M&O levy amount by the 1988 SPTB total taxable property value. The second M&O tax effort category splits districts above and below the state average M&O effective tax rate. The six special statutory districts do not levy property taxes.

## PERCENT BLACK, HISPANIC, AND MINORITY STUDENTS

In these categories, districts are grouped according to the ethnic composition of their student populations. The Fall Survey of Pupils in Membership, a one day head count taken in the fall of each school year, is the source for this information. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. Each of these categories has six subcategories with the particular population ranging from less than 5 percent to 50 percent and over.

## EDUCATION SERVICE CENTER REGIONS

The state is divided into 20 geographic regions, each served by an Education Service Center.

## STATE PROPERTY TAX BOARD HIGHEST CATEGORY

In 1988, the SPTB classified property into 14 categories based on how the property is used. These 14 are aggregated into four classifications as follows:

| | |
|---|---|
| *Residential:* | Single-family and multi-family residential, and residential inventory. |
| *Land:* | Vacant lots, acreage, and farm/ranch improvements |
| *Oil and Gas:* | Oil, gas and minerals |
| *Business:* | Commercial and industrial real, commercial and industrial personal, and utilities |

The one category of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory districts form a separate group because they have no taxable property wealth.

## PRICE DIFFERENTIAL INDEX LEVEL

The price differential index (PDI) reflects geographic variations in costs beyond the control of school districts. Each biennium the PDI must be formulated by an advisory committee and adopted by the

State Board of Education. The index used in 1988-89 was first applied in 1985-86 and was used in all subsequent years through 1988-89. The 1988-89 PDI has a minimum value of 1.00 and a maximum of 1.247. This category divides districts into four groups with approximately equal numbers of districts in each.

## PERCENT LOW INCOME STUDENTS

Percent low income is the best six months average of 1987-88 participants in the free and reduced price lunch program expressed as a percentage of the 1988-89 refined ADA in the district. The prior year count is used to fund the state compensatory education program.

## TEAMS: PERCENT PASSING ALL TESTS TAKEN

For grades 3, 5, 7, 9, and 11, the total number of students who passed all sections taken is expressed as a percentage of the total number of students tested. Districts are grouped into five subcategories with the percent passing ranging from under 50 percent to 90 percent and over. Beginning in 1988-89, any scores reported for special education students who took the test are excluded, as are grade 3 Spanish test results.

## OPERATING COST PER STUDENT

Operating costs are the sum of all expenditures budgeted for the operation of the district, for all funds. The operating expenditures are a subset of the total expenditures. Per student amounts are the 1988-89 expenditures divided by 1988-89 refined ADA. Districts are grouped into five categories with approximately equal numbers of districts in each. The source for expenditures is the fall 1988 submission of the Public Education Management System (PEIMS).

## REFINED ADA CHANGE FROM PRIOR YEAR

This category looks at the growth or decline in student population over a one year period. Districts whose refined ADA declined represent one grouping, while the remaining groups show one year growth rates ranging from "0% - 3%" to "10% and over."

## STUDENT DENSITY

The square miles in a school district were determined through a joint effort by the SPTB, the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the SPTB were digitized by the Water Commission and acreage was determined. Density is the number of students in refined ADA per square mile. Density groups range from less than five students per square mile to 100 or more students per square mile. The six special statutory districts form a separate group because mileage information is not available for them.
